Eurowood™

Innovative products & coatings

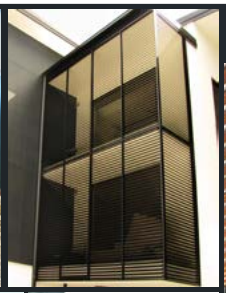

EziALI™

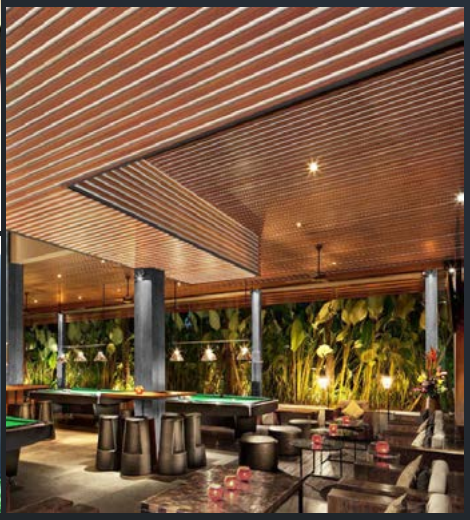

For the last 10 years Euro**WOOD**™ Innovative Coatings & Ezi**ALI**™ systems have been heavily involved in the research and development of "**Super Durable**" finishes that would complement any non-welding assembly system, including their own unique Ezi**ALI**™ patented systems.

ALUMINIUM SCREENING NEVER LOOKED SO GOOD!

The aim of these new style "**Super Durable**" finishes is to create a paradigm shift in what the market can now expect from coated aluminium finishes.

The cleverness of our patents enables a very simple assembly procedure with no welding or powder coating during or after manufacture.
All the products can be easily assembled by semi-skilled labourer, using pre powder-coated profiles.
The savings in labour & turnaround costs are substantial, meaning you can supply stylish, high demand products at very competitive prices.

MADE IN AUSTRALIA

The colours shown in this catalogue are as close to the actual colours as the printing process allows and might vary from the actual Eurowood™ images or powder coated colour. MPG GROUP recommends using colour samples which are available upon request.
