Thinking of Roller Shutter protection for your home?

maxim™ Roller Shutter Systems

the perfect window protection for
every home and every season

The perfect window protection for every home and every season

Extreme climate conditions are not unusual in Australia, especially during the summer and winter months. You may find that heat and cold enters or escapes your home through the windows. By installing **Maxim Roller Shutters** you can improve the insulation qualities of your home.

You can **reduce summer heat** entering through your windows **by up to 90%**, and **reduce heat loss** during winter **by up to 70%**. This ultimately helps you save on the cost of heating and cooling your home all year round.

More privacy for your family

Maxim Roller Shutters provide you and your family with the privacy you deserve. Both during the day and night you have total control over the amount of privacy you require from within the comfort of your home. And our roller shutters are designed to **reduce noise levels by up to 50%**, giving your family a quiet and comfortable living environment.

More control over light

We all know that UV rays entering through windows can be damaging to your furnishings, carpets and drapes. **Maxim Roller Shutters** can easily be adjusted to any height allowing in the desired amount of light, minimising any furniture or fixture damage, and giving you control of the light in your home.

Protect against accidents

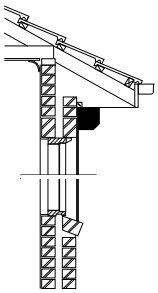

And those broken windows are a thing of the past, especially for those families with children who love playing outdoors, or who live in areas that experience stormy weather. If you live in the hills or heavy scrub areas, **Maxim Roller Shutters** can even help with protecting your home during the bushfire season.

Extra security against intruders

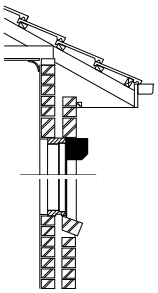

Burglaries and home invasions are on the increase. No longer can you consider your home a safe haven. But with **Maxim Roller Shutters** your home can once again be your castle. Once fully closed, our roller shutters make it very difficult for intruders.

Superior paint processes

All **Maxim Roller Shutters** offer a better paint finish because they are taken through our state of the art, three-stage paint process which includes 1) pre-treatment, 2) a base coat and 3) a clear coat lacquer. We offer a range of 12 architectural colours, so our roller shutters complement the colour scheme of your home.
